TECHNICAL SKILLS

- **Languages** : C++, C#, Java, Javascript, TypeScript.
- **Technologies** : React.js, Redux, Redux Toolkit, Tailwind CSS, Hibernate, Java Spring Boot, Microservices, .NET MVC.
- **Databases** : MYSQL, MS-SQL Server, MongoDB.
- **Version Control**: GIT , GITHUB.

EXPERIENCE

Konnect Insights | Software Developer

September 2024–Present | Mumbai, India

- **Integrated AI-powered automation** using OpenAI's APIs, implementing **automatic summarization** and **workflow automation**, reducing **manual effort** and **increasing efficiency**.
- **Developed a bulk action feature**, enabling users to **process multiple tickets simultaneously**, enhancing **productivity** and **streamlining workflow**.
- **Enhanced role-based access control**, improving **security**, **flexibility**, and **compliance** by introducing **granular permissions** and **controlled agent actions**.

Konnect Insights | Junior Software Developer

August 2023–August 2024 | Mumbai, India

- **Led the migration** of a **legacy CMS** from **ASPX** to **React.js (TypeScript)** and **ASP.NET Core**, including **RESTful API development**, **optimized SQL queries**, and **secure authentication**.
- **Designed and developed a complete module from scratch**, implementing **backend logic (ASP.NET Core)**, **efficient stored procedures**, and a **responsive UI (JavaScript, Bootstrap)**.
- **Enhanced an ongoing module**, implementing **core features** and **new functionalities** based on client requirements.
- **Developed new features** and **resolved critical bugs**, significantly improving **stability** and **performance**.

ITXJOBS | Web Developer Intern

August 2023–August 2024 | Mumbai, India

- **Developed a fully responsive web page** for a section of **itjobxs.com**, optimizing the **user experience**.
- **Implemented user authentication and bot detection**, tackling **security challenges** and **removing fake bots and posts**.
- **Integrated Google reCAPTCHA**, adding an **extra layer of security** to **protect against automated attacks**.

PROJECTS

OneChat ([Github](#))

- Built a fully responsive chat application using **SOCKET.IO** for instant one-to-one and group messaging, ensuring a seamless and interactive real-time experience.
- Users can **create chat groups**, **upload/download files**, and maintain **organized conversations** with state management handled via **Zustand** for optimal performance.
- Developed using **React**, **Node.js**, **Express**, **MongoDB**, and other modern tools making it production-ready .

CabXPress ([Github](#))

- A Cab Booking Website with a **complete registration & login and auth** system allowing users to sign up either as a **Passenger** or **Captain (Driver)**, managing role-specific dashboards and functionalities.
- Passengers can **book rides**, while captains can **accept/reject requests**. **Real-time ride updates** and status changes are handled via **SOCKET.IO**, ensuring smooth ride flow.
- Built with the **MERN stack (MongoDB, Express, React, Node.js)** and built to give a **real-world experience** .

Echonet ([Github](#))

- A Social Media site where Users can **create posts (ECHO/tweets)**, **like/unlike**, and **follow/unfollow** others—mimicking the essential interactions of modern social platforms.
- **Built-in JWT-based authentication** ensures **protected routes** and **user sessions**, with a **smooth sign-up/sign-in** experience.
- **Developed using MongoDB, Express, React, Node.js**, and modern UI practices to ensure smoothness and scalability.

Education

Vidyalankar Institute of Technology, University of Mumbai

Aug 2019 – Sep 2023

B.E. Computer Science and Engineering , 8.45 CGPA (on 10-Scale)
